

 Bluetooth

Navigator Mobile

The universal Interface for the wireless diagnosis

The **Navigator Mobile** hardware interface is able to connect and communicate with cars and commercial vehicles electronic control systems.

Connected to the Axone 3 Mobile or to a PC, through a cable or via *Bluetooth*, diagnostic testing such as warning light reset, key programming, error reading and deleting, ECU configuration activations and regulations can be performed.

Wireless technology allows system monitoring while the vehicle is stationary or in motion within *Bluetooth* range.
